

NOVA School of Science and Technology

Exchange semester	Autumn semester 2025
Study level	Graduate (Master)
Home faculty at GU	IT-Faculty
Studies at GU	Applied Data Science

Courses during exchange

- Computer Vision
- Cloud Computing
- Systems Privacy
- Requirements Engineering
- Human-Computer Interaction

Studies

Different semester structure, here we had 5 courses at once with exams in October and December, and then final exams in January for people who did not collect 50% of the points or wanted to improve their grade.

Arrival, orientation and housing

I settled in very easily, we had a lot of interaction events organized by the university like Erasmus Dinner which helped to meet new people already at the beginning of the exchange.

Finances

Housing was very expensive for me, even outside the main area of Lisbon I paid 500 eur a month for a fully furnished room in Caparica. Food is a bit cheaper than in Sweden and going-out is much cheaper. Public transport was very expensive, 40 eur for a monthly ticket.

Life in a new country/culture

It was awesome. I could do a lot of sports, spend a lot of time with friends and even travel. The weather in Lisbon was sunny up until mid-November which made the exchange incredibly fun.

Overall exchange experience

I am very happy I was chosen for this exchange, I met a lot of fantastic people and discovered a completely different way of life compared to Sweden/Poland. I tried so many new things it is hard to count.
