

National University of Singapore

Exchange semester	Autumn semester 2025
Study level	Undergraduate (Bachelor)
Home faculty at GU	Faculty of Science
Studies at GU	Marine science with focus on physics

Courses during exchange

- Mathematical methods in physics
- Classical mechanics
- Linear algebra
- Thermodynamics and statistical mechanics

Studies

Having 4 courses at the same time instead of 1. Having a finals week with all exams in one week and that it was done before Christmas.

Arrival, orientation and housing

It was very easy and went smoothly. A lot of instruction to help you settle in.

Finances

It was a bit expensive to just pay everything at once but when you arrived it was okay. Food was cheaper in general and I had a meal plan which saved me some money in the long run.

Life in a new country/culture

It was good! I meet a lot of new friends and had some opportunities to travel during weekend and recess week.

Overall exchange experience

It was good! Had some struggle to adapt to the new system and tempo but I still think it was worth it!
